Florida’s first BSN-DNP Nurse Anesthesia degree program targets bachelor’s-level prepared nurses with or without a master’s degree. Program highlights include small class sizes, low instructor to student ratios, challenging academics, world class campus facilities, and superior simulation and clinical experiences. Our primary clinical affiliations are with the University of Miami Hospital, Jackson Health Systems and the Miami VA Healthcare System. Over 250 community partners provide excellent opportunities for clinical exposure to diverse patient populations across a range of practice settings, all within one hour drive from campus. The DNP courses prepares nurses to create, administer and evaluate practice interventions and systems for health care to reduce health care disparities. Graduates are experts in nursing practice, focusing heavily on evidence-based innovations.

**Program Highlights**

- 36 months (9 semesters) of full-time study
- Program includes clinical and simulation experience
- Combination of online and on-campus classes
- Small class sizes & low instructor to student ratio
- Challenging academics
- Superior clinical learning
